## Purpose

RMWB is preparing a new Municipal Development Plan (MDP) to reflect changes in the social, cultural, and economic conditions of the region.

The new MDP will be created with input from residents throughout Wood Buffalo to ensure it reflects local values, opportunities, and challenges, and sets a clear vision for the Region's future.

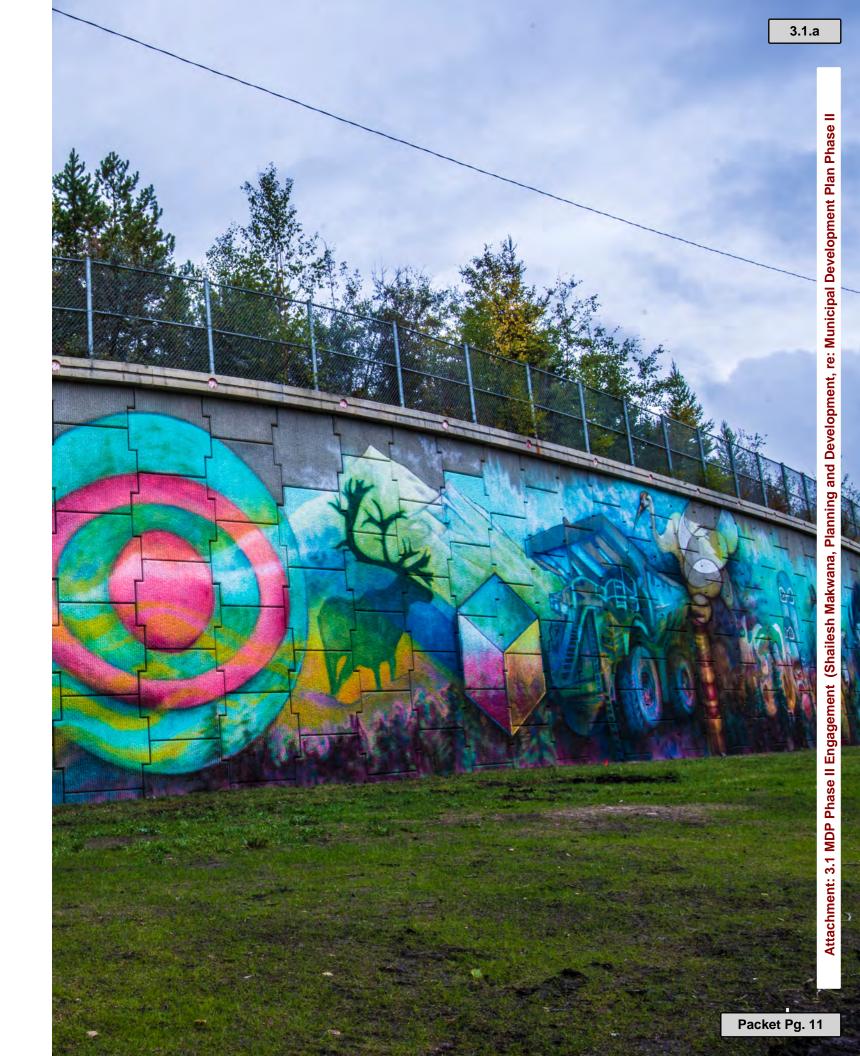

## What is the MDP?

The MDP sets out the vision and blueprint for how growth and development will happen in Wood Buffalo over the next 20 years.

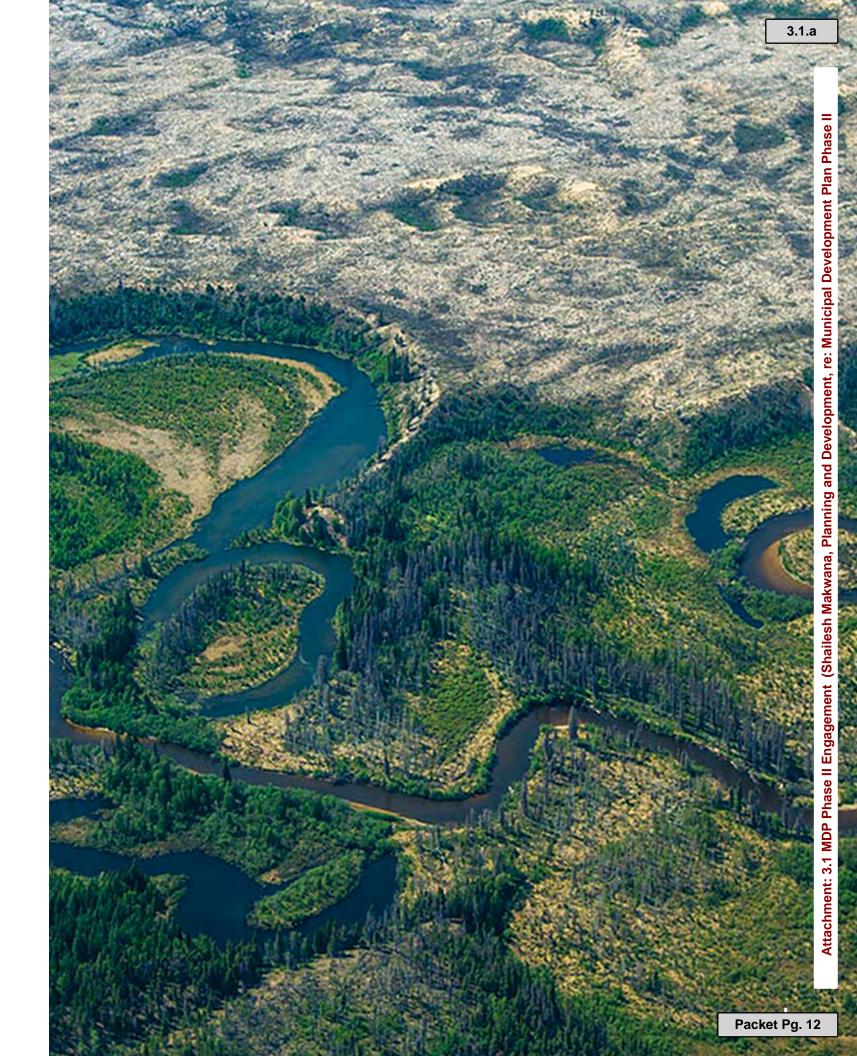

## The MDP will:

- » Provide a comprehensive land use policy framework
- » Outline a strategic path forward to manage growth across the Region
- » Guide both short- and long-term decision making by Council and Administration
- » Decisions will shape the development and future changes made to your communities

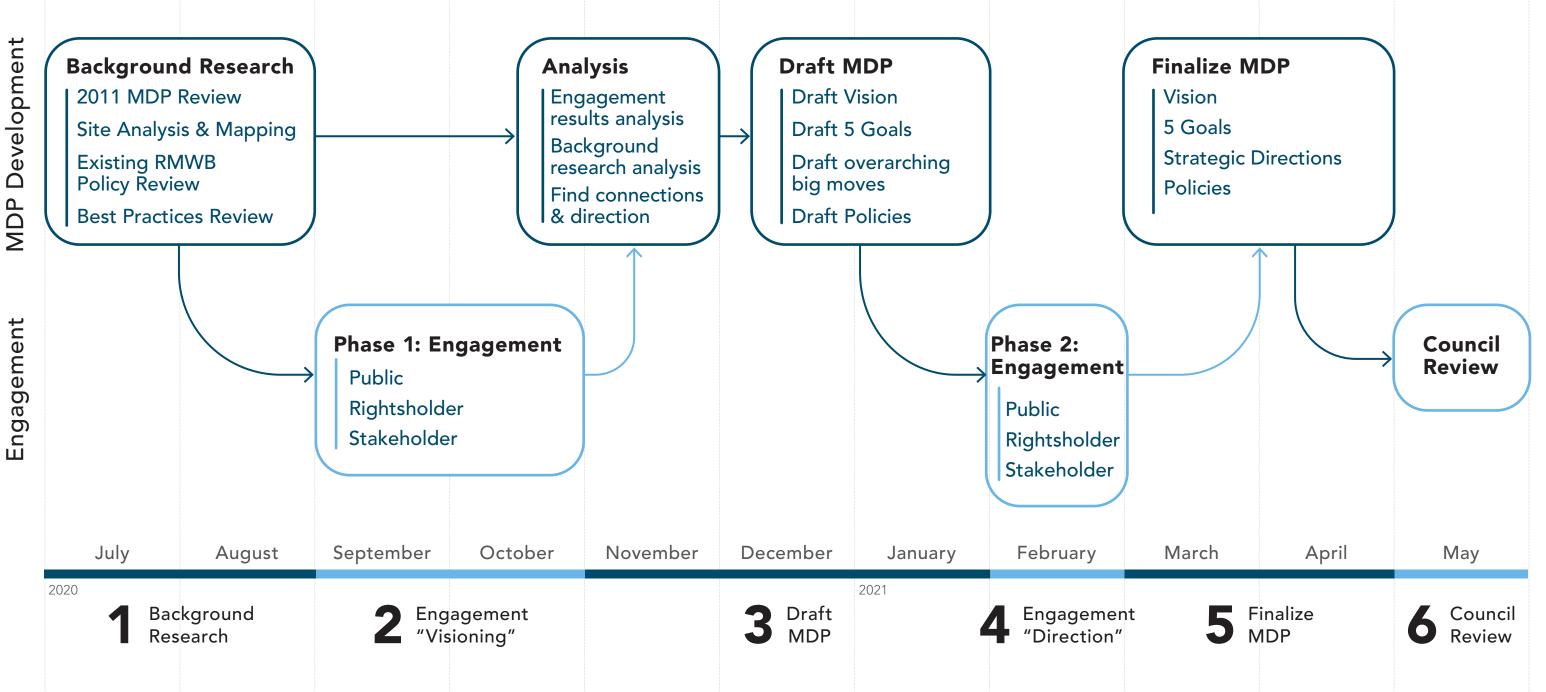

## Why is it important?

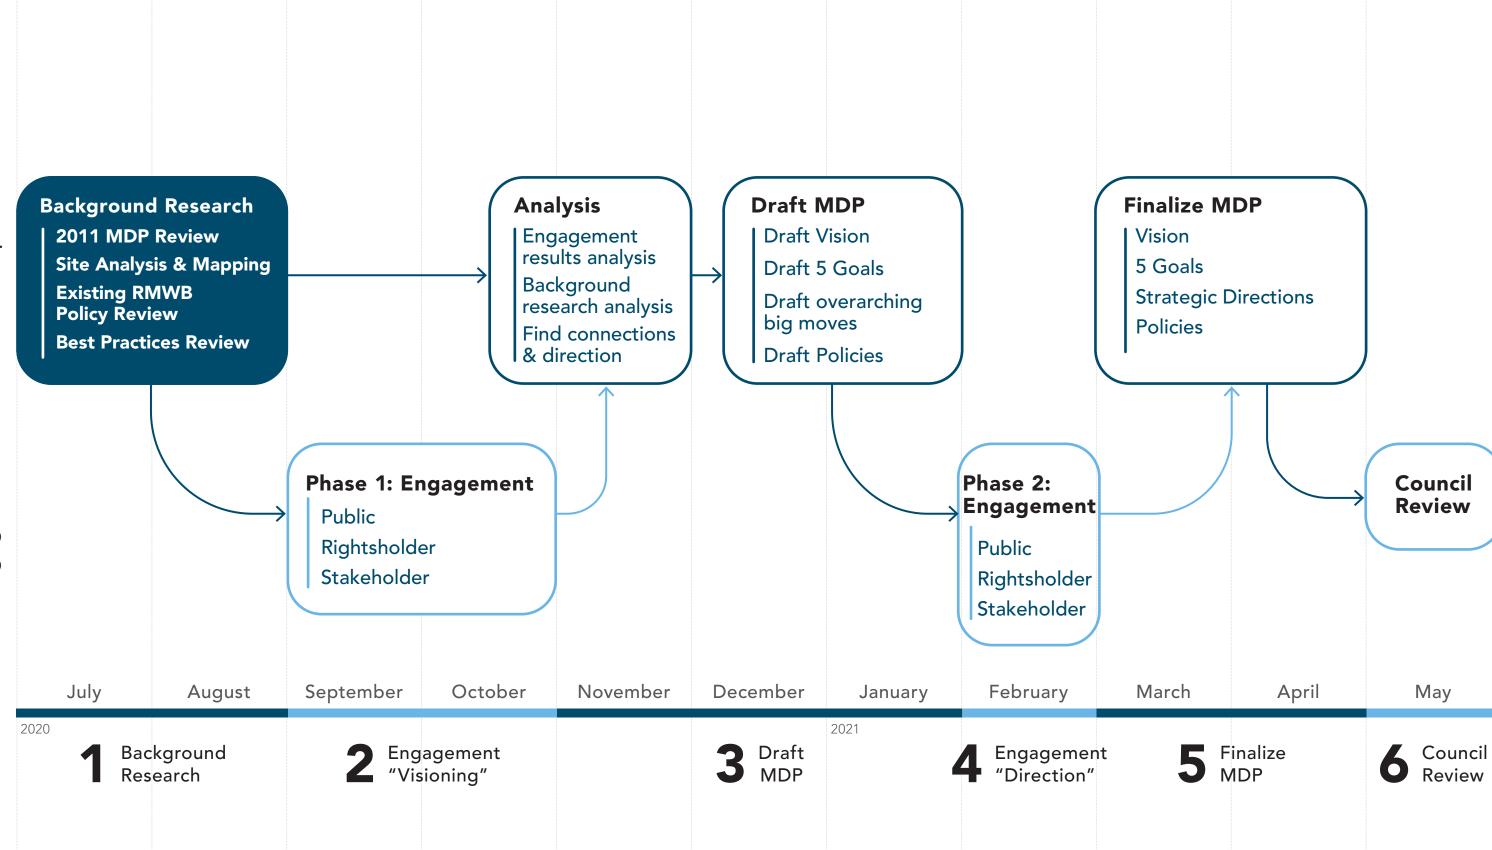

- » The 2011 MDP growth projections indicated that Wood Buffalo's population would grow to over 230,000 people by 2030
- » This growth has not happened due to several factors, including the 2013 floods, the 2014 global drop in oil prices and resulting economic downturn, the 2016 Horse River Wildfire, and the 2020 floods
- » In response to changing social and economic environments, the Municipality has taken this opportunity to reflect today's conditions through a new MDP
