Subject: Questions

Hi Susan,

As discuss, Brad Friesen (Dunvegan Garden Ltd) requested for the meeting to discuss the draft Draper ASP. The draft ASP proposes Intensive agriculture will be the primary use in areas designated as Small Holding. I can understand Brad would like to discuss the possible proposals for his property. However, it's a good opportunity if we could get some information from Brad regarding agriculture operation in the Draper area. I have prepared the following questions to discuss with Brad and understand his perspective as a major agriculture operator in the Draper area.

Questions:

1. In your opinion, how many land owners are interested for agriculture operation in the Draper area?
2. What kind of agriculture uses people are interested in? (Market gardening/livestock/intensive agriculture?)
3. What kind of agriculture uses would like to see in the Draper area (Market gardening/livestock/intensive agriculture?)
4. What is the best time period for farming? Starting and ending month?
5. What is the use of agriculture land in winter?
6. What are your expectations to include in the ASP?
7. What challenges do you face for farming?
8. What associated uses of agriculture you would like to see in the Draper area?
9. What minimum size of lot do you think suitable for agriculture operation?
10. Any suggestion to add in the ASP?

I would appreciate your review. Please feel free to add or make any changes you deem necessary.

Thanks

Muhammad
